

## Exercice 1 :

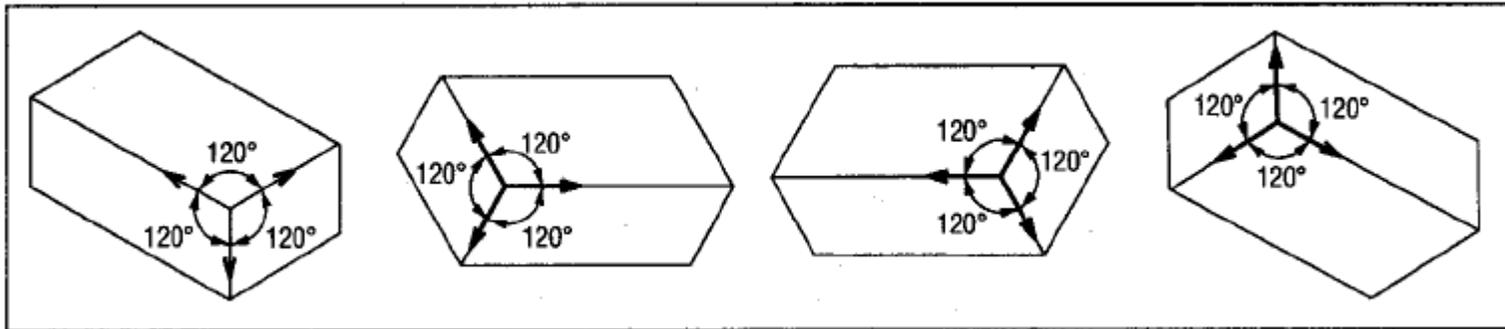

### b. Pièce prismatique en perspective isométrique

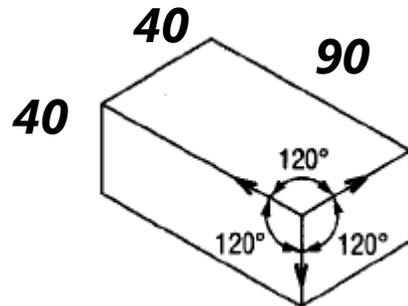

## Rappel:

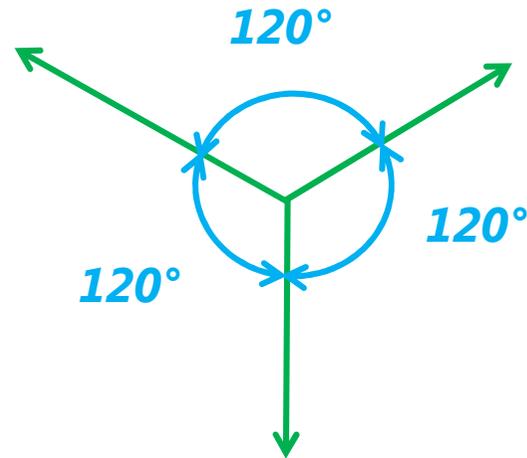

*On choisit l'orientation pour représenter le maximum de détails*

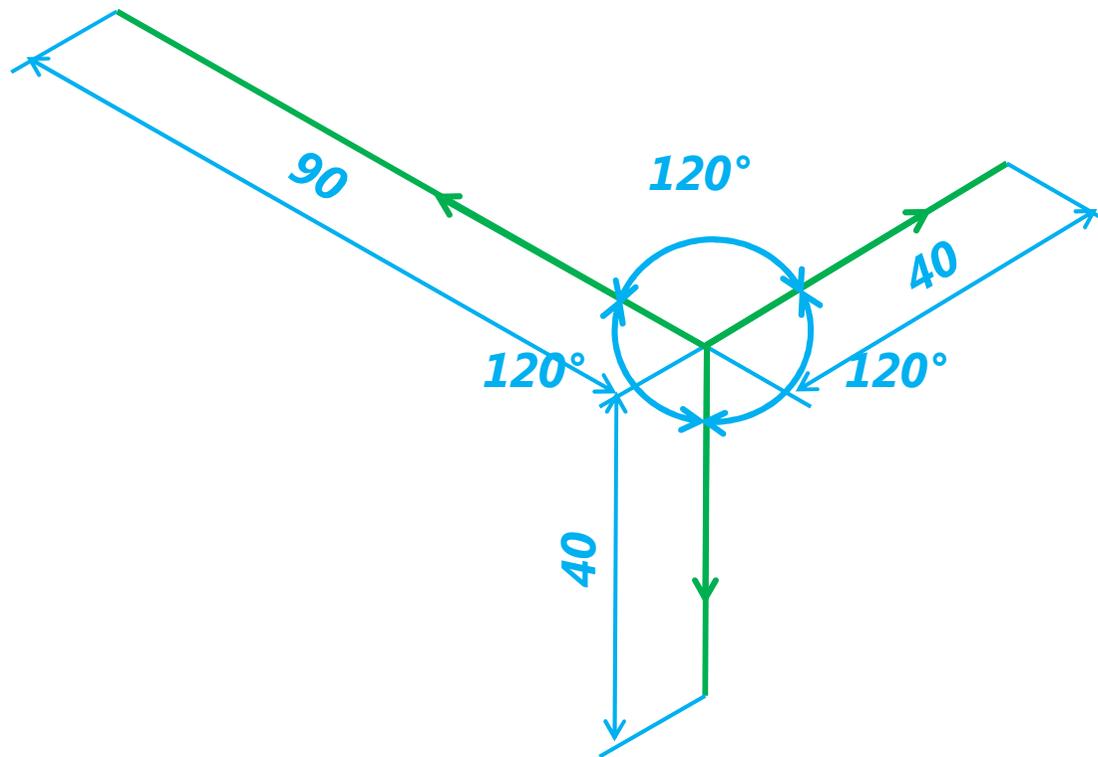

*Le parallélépipède rectangle (40x40x90) enveloppe la pièce*

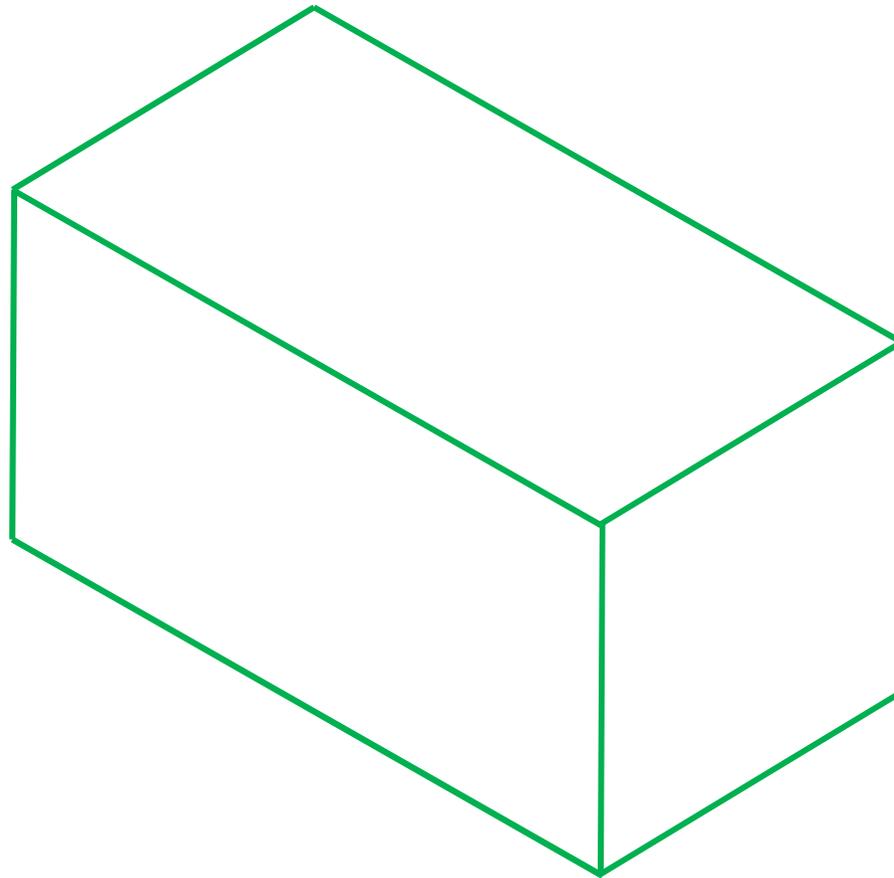

***Construction du parallélépipède rectangle (40x40x90) qui enveloppe la pièce***

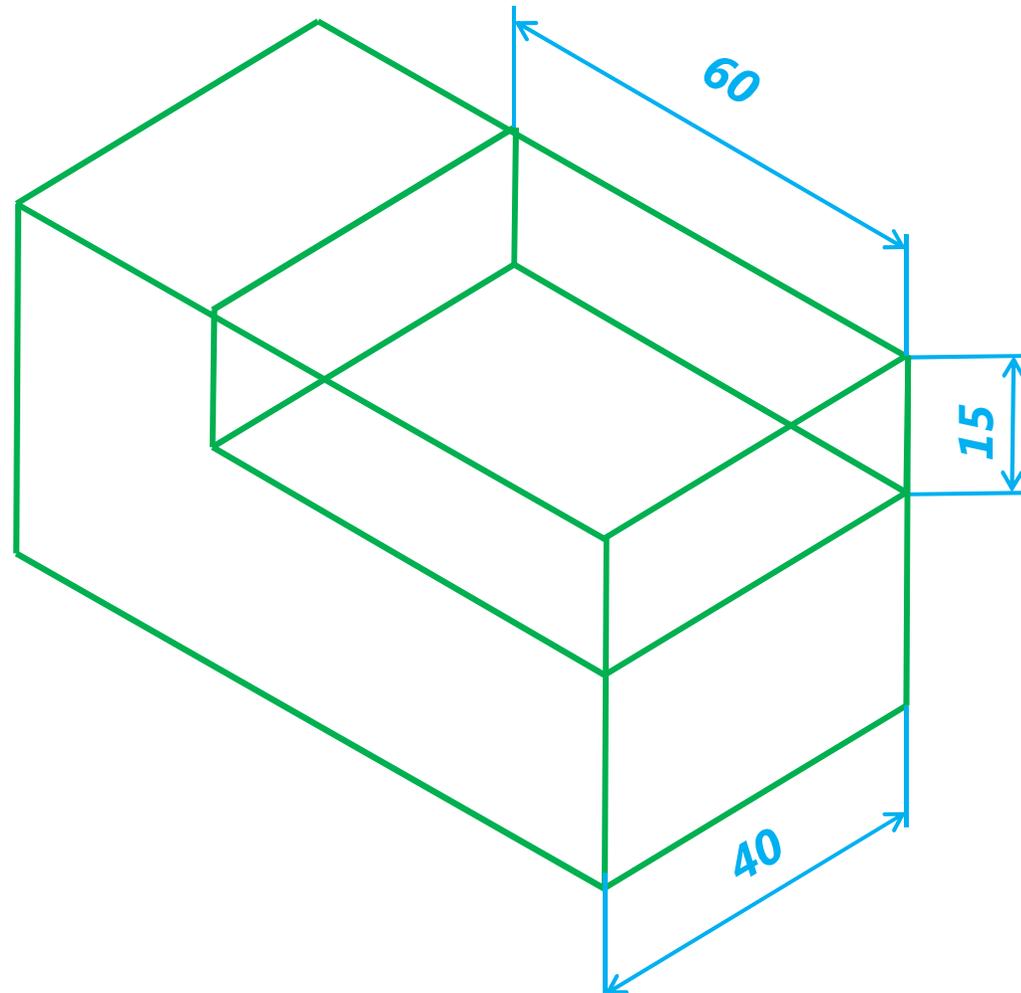

**Construction du parallélépipède rectangle (40x40x90) qui enveloppe la pièce**

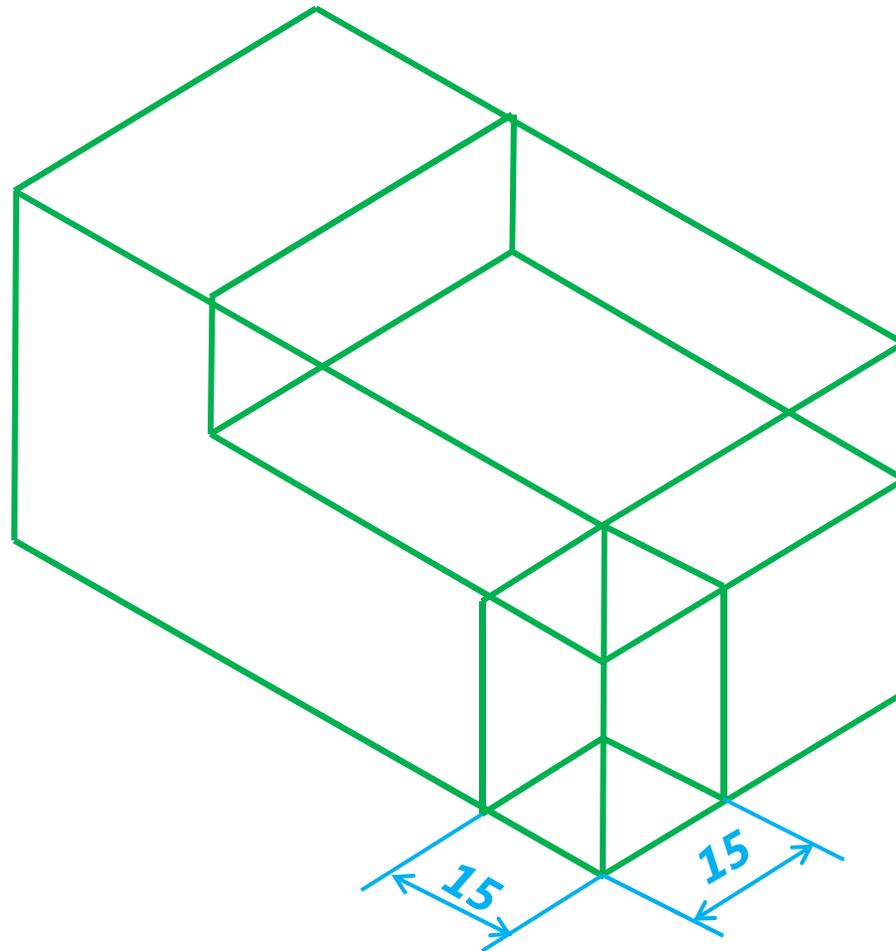

***Construction du parallélépipède rectangle (40x40x90) qui enveloppe la pièce***

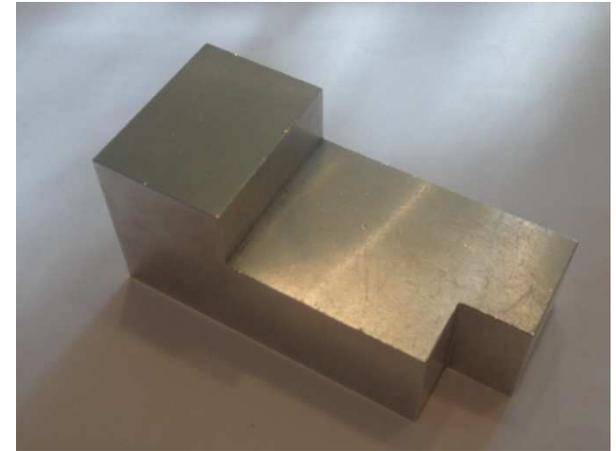

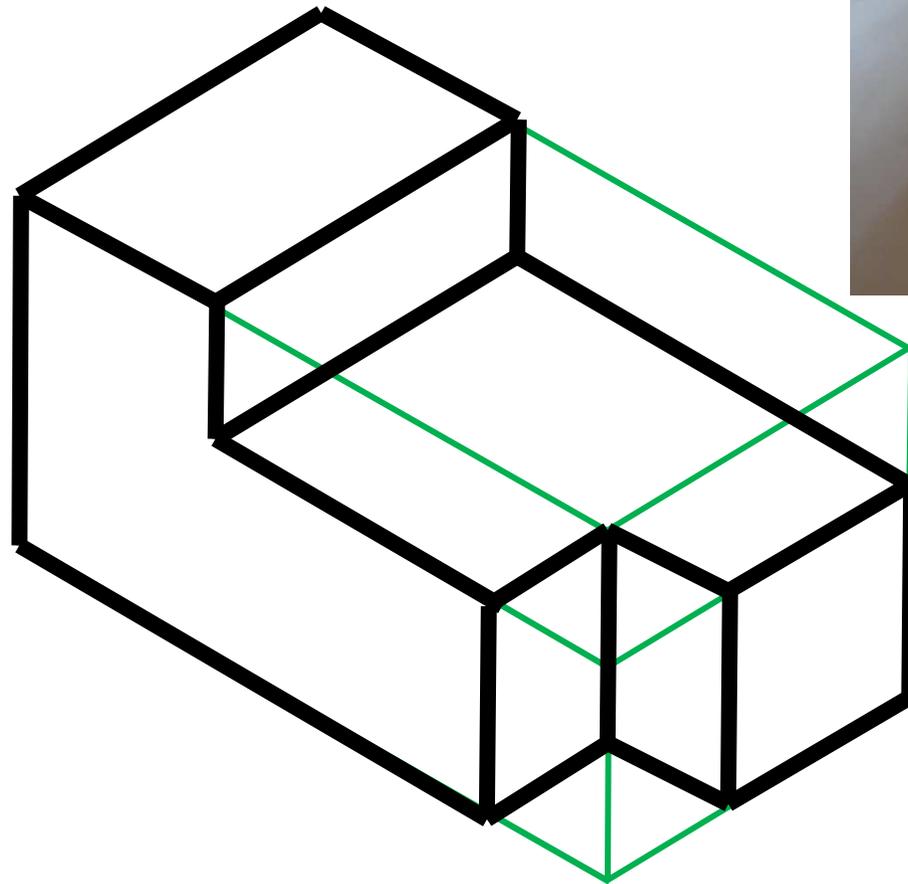

**Réalisation de l'entaille horizontale: on construit un parallélépipède rectangle (40x15x60)**

**Réalisation de l'entaille verticale: on construit un parallélépipède rectangle (40x15x60)**

*On repasse en trait fort les segments qui représentent des arêtes vues*

*Enfin, on effectue la cotation*
